

Round 6 — Spa-Francorchamps

Porsche 911 GT3 R (992) '22 | Gran Turismo 7 | BOP: ON

■ RACE SPECIFICATIONS

Parameter	Value	Parameter	Value
Duration	60 minutes	Grid	Reverse
Tyre Wear	4x	Start	Rolling
Fuel	3x	Tuning	Brake Balance only
Weather	Random / Rain chance	Qualifying	10 min — Must use RS
Pit Rules	As necessary	Tyre Allowance	RM RH RS IM WET

■ SITUATION ASSESSMENT

Critical threats at 4x wear on this car:

Corner	Threat
Eau Rouge / Raidillon	Rear engine weight helps traction through compression. But pendulum snap on exit is real.
Pouhon	Rear weight = excellent traction but front end can wash out. Unique challenge.
La Source exit	Outstanding traction on exit — but snap oversteer if you brake too deep.
Bus Stop chicane	Pendulum effect makes direction changes dangerous. Smooth inputs only.

Reverse grid rolling start = fighting through traffic. Protect the car early, do not chase lap times in Lap 1-3.

■ QUALIFYING PLAN — 10 min | Mandatory RS

- Out-lap: build tyre temps gently — do NOT push through Eau Rouge cold
- Flying lap 1: clean banker. No heroics. Get a time on the board.
- Flying lap 2: PUSH — RS peaks on lap 2 at Spa at 4x wear
- Lap 3: no meaningful improvement. Box and prepare tyre switch.
- Final sector: Blanchimont flat if confident. Bus Stop precise — don't ruin a clean lap.

You have 1 minute before race start to change compound. Switch to RM.

■ RACE STRATEGY — STINT PLAN

Stint	Tyre	Target Duration	Pit Lap Target	Notes
1	RM	~20–22 min	Lap 10–11	Manage rear in traffic. Do not push until clear air.
2	RM or RH	~20–22 min	Lap 21–22	Weather read. RH if tyre wear felt severe.
3 (if req.)	IM / WET / Remaining		—	Weather dependent. React early.

- Do NOT start on RS. At 4x wear, RS dies in 15–18 min at Spa. RM is mandatory race start.
- Two-stop is very possible. Be mentally prepared before the race.

■ FUEL PLAN — 3x Multiplier

Condition	Fuel Map	Reason
Normal running, clear air	Map 4	Standard — no sacrifice needed
Stuck in traffic, no overtake	Map 3	Save without hurting race position
Fuel short risk only	Map 2	Last resort — costs real lap time

Two stops with Map 4 throughout should be sufficient. Do not overthink fuel — tyres are the priority.

■ WEATHER PROTOCOL — This Decides the Race

Condition	Action
Stays dry throughout	RM → RM (two stops)
Heavy rain starts during stint	Box IMMEDIATELY for WET — do not wait
Light rain / drying line	Stay on RM until dangerous, then IM
Rain starts between stints	Take IM (not WET) — easier to manage on drying track
Drying in Stint 2 or 3	IM → RM when dry racing line forms

At Spa, getting caught on slicks in heavy rain costs 30+ seconds. React early, not late.

■ BRAKE BALANCE PLAN

Phase	Setting	Reason
Race start (traffic)	-2 to -3	More front bias — rear engine already provides rear braking force
Mid-race (clear air)	-1 to -2	Balanced as tyres warm, trust rear traction
Final stint (worn tyres)	0 to -1	Worn tyres — front bias prevents rear pendulum lock

■ NEVER go positive. RR pendulum effect amplifies any rear instability. Straight-line braking into corners.

■ KEY DRIVING NOTES — CORNER BY CORNER

EAU ROUGE / RAIDILLON

- Rear traction is your advantage — commit fully through compression
- Over the crest: smooth throttle, any sudden input triggers pendulum
- Braking must be complete before entry — RR snaps under trail braking here

LA SOURCE

- Brake in a straight line — RR punishes trail braking into turns
- Exit traction is phenomenal — but don't get greedy with early throttle
- On worn tyres: the rear will pendulum if you push. Patience.

POUHON

- Front end washes out before the rear lets go — unusual for Spa
- Carry slightly less entry speed than MR/FR cars
- On worn tyres: front push becomes significant. Trust it, don't fight it.

BUS STOP CHICANE

- DANGER ZONE — pendulum effect in direction changes is worst here
- Brake early and in a straight line. Do NOT trail brake.
- Smooth inputs through the chicane. No heroics.

BLANCHIMONT

- Rear traction makes this less scary — flat on fresh tyres
- Worn tyres: the rear engine weight helps but front can push
- If in doubt, lift. The 911 recovers well from a lift.

OVERTAKING ZONES:

- End of Kemmel Straight into Les Combes — best opportunity of the lap
- Out-braking into La Source from long straight — commit early or don't try
- Bus Stop chicane — high risk, last resort only

■ WHAT WILL LOSE THE RACE

1	Starting on RS	Dead in 15-18 min. Early pit destroys all reverse-grid progress.
2	Ignoring weather	Staying on slicks in rain at Spa is race-ending. React early.
3	Trail braking into corners	RR pendulum effect makes trail braking into turns dangerous. Brake in a straight line.
4	Aggressive Bus Stop direction changes	Pendulum snap in chicanes ends races. Smooth inputs only.
5	Pitting too late on worn RM	You lose more time in the last 3 laps than you save avoiding the stop.

■ SIMPLE EXECUTION SUMMARY

```
QUALIFY RS → 2 flying laps → box

PRE-RACE Switch to RM in the 1-minute window

LAP 1-3 Survive traffic. No risks. Protect rears.
LAP 4-9 Find rhythm. Manage Pouhon and La Source exits.
LAP 10-11 PIT. Fresh RM (or RH if wear felt severe).

WEATHER Any rain signal → react immediately – don't wait

STINT 2 Push in clean air. Blanchimont flat on fresh rubber only.
FINAL STINT Rear protection mode. Brake balance to 0 or -1.

WIN ON CONSISTENCY.
```
