

Round 6 — Spa-Francorchamps

Renault R.S.01 GT3 | Gran Turismo 7 | BOP: ON

■ RACE SPECIFICATIONS

Parameter	Value	Parameter	Value
Duration	60 minutes	Grid	Reverse
Tyre Wear	4x	Start	Rolling
Fuel	3x	Tuning	Brake Balance only
Weather	Random / Rain chance	Qualifying	10 min — Must use RS
Pit Rules	As necessary	Tyre Allowance	RM RH RS IM WET

■ SITUATION ASSESSMENT

Critical threats at 4x wear on this car:

Corner	Threat
Eau Rouge / Raidillon	MR compression loads rear hard every lap. Light weight amplifies snap risk on exit.
Pouhon	Sustained lateral load kills right-rear. Light car amplifies tyre stress.
La Source exit	MR snap oversteer under power. Very responsive to throttle inputs.
Bus Stop chicane	Light MR can get unsettled by direction changes. Smooth inputs critical.

Reverse grid rolling start = fighting through traffic. Protect the car early, do not chase lap times in Lap 1-3.

■ QUALIFYING PLAN — 10 min | Mandatory RS

- Out-lap: build tyre temps gently — do NOT push through Eau Rouge cold
- Flying lap 1: clean banker. No heroics. Get a time on the board.
- Flying lap 2: PUSH — RS peaks on lap 2 at Spa at 4x wear
- Lap 3: no meaningful improvement. Box and prepare tyre switch.
- Final sector: Blanchimont flat if confident. Bus Stop precise — don't ruin a clean lap.

You have 1 minute before race start to change compound. Switch to RM.

■ RACE STRATEGY — STINT PLAN

Stint	Tyre	Target Duration	Pit Lap Target	Notes
1	RM	~20–22 min	Lap 10–11	Manage rear in traffic. Do not push until clear air.
2	RM or RH	~20–22 min	Lap 21–22	Weather read. RH if tyre wear felt severe.
3 (if req.)	IM / WET / Remaining		—	Weather dependent. React early.

■ Do NOT start on RS. At 4x wear, RS dies in 15–18 min at Spa. RM is mandatory race start.

■ Two-stop is very possible. Be mentally prepared before the race.

■ FUEL PLAN — 3x Multiplier

Condition	Fuel Map	Reason
Normal running, clear air	Map 4	Standard — no sacrifice needed
Stuck in traffic, no overtake	Map 3	Save without hurting race position
Fuel short risk only	Map 2	Last resort — costs real lap time

Two stops with Map 4 throughout should be sufficient. Do not overthink fuel — tyres are the priority.

■ WEATHER PROTOCOL — This Decides the Race

Condition	Action
Stays dry throughout	RM → RM (two stops)
Heavy rain starts during stint	Box IMMEDIATELY for WET — do not wait
Light rain / drying line	Stay on RM until dangerous, then IM
Rain starts between stints	Take IM (not WET) — easier to manage on drying track
Drying in Stint 2 or 3	IM → RM when dry racing line forms

At Spa, getting caught on slicks in heavy rain costs 30+ seconds. React early, not late.

■ BRAKE BALANCE PLAN

Phase	Setting	Reason
Race start (traffic)	-2 to -3	Front bias essential for MR stability in traffic
Mid-race (clear air)	-1 to -2	Slightly less front as rears warm
Final stint (worn tyres)	0 to -1	Worn rears — light car locks easily, keep front bias

■ NEVER go positive. MR layout already rotates under braking. Positive bias = snap oversteer at La Source or Bus Stop.

■ KEY DRIVING NOTES — CORNER BY CORNER

EAU ROUGE / RAIDILLON

- Complete braking BEFORE the flick — do not trail brake through compression
- Light car is responsive — any correction mid-Raidillon = snap
- Smooth throttle over crest, commit fully

LA SOURCE

- Excellent turn-in — use it, but don't over-rotate
- Throttle modulation on exit — MR snap is violent in this car
- Final stint on worn rubber: extra patience required

POUHON

- Right-rear degradation is the story here
- Early apex, smooth increasing throttle
- On worn tyres: carry less speed, preserve rubber for straight

BUS STOP CHICANE

- Light car gets unsettled by kerbs and direction changes
- Keep brake balance front-biased
- Smooth inputs through the chicane — don't fight the car

BLANCHIMONT

- Flat on fresh tyres, light car has good aero load
- Worn tyres: lift slightly, the rear will move
- If in doubt, lift. 0.2s lost beats a crash.

OVERTAKING ZONES:

- End of Kemmel Straight into Les Combes — best opportunity of the lap
- Out-braking into La Source from long straight — commit early or don't try
- Bus Stop chicane — high risk, last resort only

■ WHAT WILL LOSE THE RACE

1	Starting on RS	Dead in 15-18 min. Early pit destroys all reverse-grid progress.
2	Ignoring weather	Staying on slicks in rain at Spa is race-ending. React early.
3	Aggressive throttle at La Source	MR snap in light car is violent. One mistake = spin or crash.
4	Positive brake balance	MR rotates under braking already. Positive bias = uncontrollable snap.
5	Pitting too late on worn RM	You lose more time in the last 3 laps than you save avoiding the stop.

■ SIMPLE EXECUTION SUMMARY

QUALIFY RS → 2 flying laps → box

PRE-RACE Switch to RM in the 1-minute window

LAP 1-3 Survive traffic. No risks. Protect rears.

LAP 4-9 Find rhythm. Manage Pouhon and La Source exits.

LAP 10-11 PIT. Fresh RM (or RH if wear felt severe).

WEATHER Any rain signal → react immediately – don't wait

STINT 2 Push in clean air. Blanchimont flat on fresh rubber only.

FINAL STINT Rear protection mode. Brake balance to 0 or -1.

WIN ON CONSISTENCY.
