

Round 6 — Spa-Francorchamps

Porsche 911 RSR (2017) | Gran Turismo 7 | BOP: ON

■ RACE SPECIFICATIONS

Parameter	Value	Parameter	Value
Duration	60 minutes	Grid	Reverse
Tyre Wear	4x	Start	Rolling
Fuel	3x	Tuning	Brake Balance only
Weather	Random / Rain chance	Qualifying	10 min — Must use RS
Pit Rules	As necessary	Tyre Allowance	RM RH RS IM WET

■ SITUATION ASSESSMENT

Critical threats at 4x wear on this car:

Corner	Threat
Eau Rouge / Raidillon	MR compression loads rear hard. RSR's sharp handling demands precision.
Pouhon	Sustained lateral load degrades right-rear. RSR's balance helps manage.
La Source exit	MR throttle oversteer present. RSR is sharper than most MR cars.
Bus Stop chicane	Sharp handling helps direction changes but MR braking instability remains.

Reverse grid rolling start = fighting through traffic. Protect the car early, do not chase lap times in Lap 1-3.

■ QUALIFYING PLAN — 10 min | Mandatory RS

- Out-lap: build tyre temps gently — do NOT push through Eau Rouge cold
- Flying lap 1: clean banker. No heroics. Get a time on the board.
- Flying lap 2: PUSH — RS peaks on lap 2 at Spa at 4x wear
- Lap 3: no meaningful improvement. Box and prepare tyre switch.
- Final sector: Blanchimont flat if confident. Bus Stop precise — don't ruin a clean lap.

You have 1 minute before race start to change compound. Switch to RM.

■ RACE STRATEGY — STINT PLAN

Stint	Tyre	Target Duration	Pit Lap Target	Notes
1	RM	~20–22 min	Lap 10–11	Manage rear in traffic. Do not push until clear air.
2	RM or RH	~20–22 min	Lap 21–22	Weather read. RH if tyre wear felt severe.
3 (if req.)	IM / WET / Remaining		—	Weather dependent. React early.

■ Do NOT start on RS. At 4x wear, RS dies in 15–18 min at Spa. RM is mandatory race start.

■ Two-stop is very possible. Be mentally prepared before the race.

■ FUEL PLAN — 3x Multiplier

Condition	Fuel Map	Reason
Normal running, clear air	Map 4	Standard — no sacrifice needed
Stuck in traffic, no overtake	Map 3	Save without hurting race position
Fuel short risk only	Map 2	Last resort — costs real lap time

Two stops with Map 4 throughout should be sufficient. Do not overthink fuel — tyres are the priority.

■ WEATHER PROTOCOL — This Decides the Race

Condition	Action
Stays dry throughout	RM → RM (two stops)
Heavy rain starts during stint	Box IMMEDIATELY for WET — do not wait
Light rain / drying line	Stay on RM until dangerous, then IM
Rain starts between stints	Take IM (not WET) — easier to manage on drying track
Drying in Stint 2 or 3	IM → RM when dry racing line forms

At Spa, getting caught on slicks in heavy rain costs 30+ seconds. React early, not late.

■ BRAKE BALANCE PLAN

Phase	Setting	Reason
Race start (traffic)	-2 to -3	Front bias for MR stability
Mid-race (clear air)	-1 to -2	Less front as grip builds
Final stint (worn tyres)	0 to -1	Worn rears — keep front-biased to prevent snap

■ NEVER go positive. MR layout already rotates under braking. Positive bias = snap oversteer at La Source or Bus Stop.

■ KEY DRIVING NOTES — CORNER BY CORNER

EAU ROUGE / RAIDILLON

- Complete braking before entry — MR snaps under trail braking here
- RSR's balance helps but smooth throttle over crest is essential
- Full commitment, any hesitation = rear rotation

LA SOURCE

- Minimal trail brake needed — RSR turns in sharply
- Exit throttle: smooth progressive — RSR's sharp responses amplify errors
- On worn tyres: extra caution, less input is more

POUHON

- Right-rear wear is constant. Budget for it.
- Smooth inputs — RSR rewards precision
- On worn tyres: carry less speed, preserve rubber

BUS STOP CHICANE

- MR braking instability — keep front-biased
- RSR's sharp direction changes are an advantage here if controlled
- Don't overdrive — the car does the work

BLANCHIMONT

- Flat on fresh tyres — RSR has the balance
- Worn tyres: lift slightly
- If in doubt, lift.

OVERTAKING ZONES:

- End of Kemmel Straight into Les Combes — best opportunity of the lap
- Out-braking into La Source from long straight — commit early or don't try
- Bus Stop chicane — high risk, last resort only

■ WHAT WILL LOSE THE RACE

1	Starting on RS	Dead in 15-18 min. Early pit destroys all reverse-grid progress.
2	Ignoring weather	Staying on slicks in rain at Spa is race-ending. React early.
3	Over-inputting	RSR is sharp. Too much input = snap. Less is more.
4	Positive brake balance	MR snap oversteer under braking is race-ending.
5	Pitting too late on worn RM	You lose more time in the last 3 laps than you save avoiding the stop.

■ SIMPLE EXECUTION SUMMARY

QUALIFY RS → 2 flying laps → box

PRE-RACE Switch to RM in the 1-minute window

LAP 1-3 Survive traffic. No risks. Protect rears.

LAP 4-9 Find rhythm. Manage Pouhon and La Source exits.

LAP 10-11 PIT. Fresh RM (or RH if wear felt severe).

WEATHER Any rain signal → react immediately – don't wait

STINT 2 Push in clean air. Blanchimont flat on fresh rubber only.

FINAL STINT Rear protection mode. Brake balance to 0 or -1.

WIN ON CONSISTENCY.
