

Round 6 — Spa-Francorchamps

Lexus RC F GT3 | Gran Turismo 7 | BOP: ON

■ RACE SPECIFICATIONS

Parameter	Value	Parameter	Value
Duration	60 minutes	Grid	Reverse
Tyre Wear	4x	Start	Rolling
Fuel	3x	Tuning	Brake Balance only
Weather	Random / Rain chance	Qualifying	10 min — Must use RS
Pit Rules	As necessary	Tyre Allowance	RM RH RS IM WET

■ SITUATION ASSESSMENT

Critical threats at 4x wear on this car:

Corner	Threat
Eau Rouge / Raidillon	Heavy FR handles compression well. Stable through high-speed.
Pouhon	Weight loads the right-rear hard. Higher degradation than lighter FR cars.
La Source exit	Heavy rear resists oversteer but torque can still overwhelm grip.
Bus Stop chicane	Long braking distances due to weight. Plan braking points early.

Reverse grid rolling start = fighting through traffic. Protect the car early, do not chase lap times in Lap 1-3.

■ QUALIFYING PLAN — 10 min | Mandatory RS

- Out-lap: build tyre temps gently — do NOT push through Eau Rouge cold
- Flying lap 1: clean banker. No heroics. Get a time on the board.
- Flying lap 2: PUSH — RS peaks on lap 2 at Spa at 4x wear
- Lap 3: no meaningful improvement. Box and prepare tyre switch.
- Final sector: Blanchimont flat if confident. Bus Stop precise — don't ruin a clean lap.

You have 1 minute before race start to change compound. Switch to RM.

■ RACE STRATEGY — STINT PLAN

Stint	Tyre	Target Duration	Pit Lap Target	Notes
1	RM	~20–22 min	Lap 10–11	Manage rear in traffic. Do not push until clear air.
2	RM or RH	~20–22 min	Lap 21–22	Weather read. RH if tyre wear felt severe.
3 (if req.)	IM / WET / Remaining		—	Weather dependent. React early.

■ Do NOT start on RS. At 4x wear, RS dies in 15–18 min at Spa. RM is mandatory race start.

■ Two-stop is very possible. Be mentally prepared before the race.

■ FUEL PLAN — 3x Multiplier

Condition	Fuel Map	Reason
Normal running, clear air	Map 4	Standard — no sacrifice needed
Stuck in traffic, no overtake	Map 3	Save without hurting race position
Fuel short risk only	Map 2	Last resort — costs real lap time

Two stops with Map 4 throughout should be sufficient. Do not overthink fuel — tyres are the priority.

■ WEATHER PROTOCOL — This Decides the Race

Condition	Action
Stays dry throughout	RM → RM (two stops)
Heavy rain starts during stint	Box IMMEDIATELY for WET — do not wait
Light rain / drying line	Stay on RM until dangerous, then IM
Rain starts between stints	Take IM (not WET) — easier to manage on drying track
Drying in Stint 2 or 3	IM → RM when dry racing line forms

At Spa, getting caught on slicks in heavy rain costs 30+ seconds. React early, not late.

■ BRAKE BALANCE PLAN

Phase	Setting	Reason
Race start (traffic)	-2 to -3	Heavy car needs front bias for stability
Mid-race (clear air)	-1 to -2	Balanced as tyres come alive
Final stint (worn tyres)	0 to -1	Worn rears — keep well front-biased

■ NEVER go positive. FR layout already rotates under braking. Positive bias = snap oversteer at La Source or Bus Stop.

■ KEY DRIVING NOTES — CORNER BY CORNER

EAU ROUGE / RAIDILLON

- Weight helps through compression — commit fully
- Smooth throttle, don't unsettle the heavy rear over crest
- Complete all braking before entry

LA SOURCE

- Use weight to rotate on trail brake
- Patient throttle on exit — weight means slower response but more forgiving
- Consistent technique beats heroics

POUHON

- Heavy car loads right-rear hard — budget for tyre wear here
- Smooth progressive throttle
- On worn tyres: carry less speed, the weight amplifies degradation

BUS STOP CHICANE

- Brake earlier than you think — the Lexus is heavy
- Stable direction changes but slower
- Don't try to match lighter cars' braking points

BLANCHIMONT

- Flat on fresh tyres — planted platform helps
- Worn tyres: lift early, weight makes corrections costly
- If in doubt, lift.

OVERTAKING ZONES:

- End of Kemmel Straight into Les Combes — best opportunity of the lap
- Out-braking into La Source from long straight — commit early or don't try
- Bus Stop chicane — high risk, last resort only

■ WHAT WILL LOSE THE RACE

1	Starting on RS	Dead in 15-18 min. Early pit destroys all reverse-grid progress.
2	Ignoring weather	Staying on slicks in rain at Spa is race-ending. React early.
3	Braking too late	Heavy car needs more distance. Late braking = locked wheels.
4	Aggressive La Source exits	Weight + torque overwhelm rear grip. Patience required.
5	Pitting too late on worn RM	You lose more time in the last 3 laps than you save avoiding the stop.

■ SIMPLE EXECUTION SUMMARY

```
QUALIFY RS → 2 flying laps → box

PRE-RACE Switch to RM in the 1-minute window

LAP 1-3 Survive traffic. No risks. Protect rears.
LAP 4-9 Find rhythm. Manage Pouhon and La Source exits.
LAP 10-11 PIT. Fresh RM (or RH if wear felt severe).

WEATHER Any rain signal → react immediately – don't wait

STINT 2 Push in clean air. Blanchimont flat on fresh rubber only.
FINAL STINT Rear protection mode. Brake balance to 0 or -1.

WIN ON CONSISTENCY.
```
